EDUCATION

San Diego State University

Bachelor of Science, Computer Science, Minor in Finance (GPA: 3.79)

May 2028

San Diego, CA

EXPERIENCE

SDSU TEND Lab | *Computational Research Assistant*

July 2026 - Present

- Independently developing a three-run TikTok-style experimental task in **Presentation Coding Language** for an upcoming fMRI study, simulating video scrolling, likes, and randomized interruptions to examine adolescent behavioral development
- Implemented **conditional task logic** and structured **event logging** to produce file of clean data throughout each experimental phase

San Diego State University | *IT Services Front Desk*

June 2026 - Present

- Provide technical support to students, faculty, staff, alumni, and emeriti across virtual and in person channels to diagnose Canvas, Wi-Fi, account-access, password, and software issues, assisting 5-10 users per hour
- Verify user identities and document incidents in **ServiceNow**, recording issue details and actions taken to facilitate secure account recovery and route specialized cases to the appropriate technical teams

World Computing Organization | *Frontend Developer*

October 2025 - May 2026

- Collaborated with another frontend developer to build a single-page **React** and **TypeScript** prototype for an AI mock-interview platform, creating the resume-upload interface, job-description input, visual layout, and planned interview workspace
- Connected the resume-upload flow to backend, verifying that uploaded files could be submitted and processed during development

PROJECTS

Personal Finance Dashboard | [GitHub](#)

June 2026 - Present

- Built a **FastAPI backend** in **Python** for a personal finance application with **JWT-based authentication** and user-scoped CRUD endpoints for recording and managing transactions
- Designed **PostgreSQL** models for users and transactions, managed schema changes with **Alembic**, and enforced user authentication

CrewTrace – Reboot The Earth Hackathon | [GitHub](#)

May 2026

- Built a Gemini-powered pipeline that aggregated JSON from AlertCalifornia, NOAA, NASA POWER, and Tomorrow.io into structured wildfire-condition reports and safety recommendations
- Collaborated with a 5-person team to integrate location-specific reports into a map-based React interface and validated the prototype using real low-risk conditions and simulated extreme-fire scenarios

LEADERSHIP

Devs For Impact | *Founding Vice President*

July 2026 - Present

- Co-founded a student initiative connecting SDSU developers with San Diego nonprofits, recruiting **45** members within its first few months to expand access to hands-on software experience
- Secured projects with **2** local nonprofits through direct outreach, scoping an internal cat-adoption records system and a HomeShare platform for affordable intergenerational housing

Asian Pacific Student Alliance | *Academic Coordinator*

May 2025 - May 2026

- Directed a mentorship program serving **100+** mentors and mentees, creating applications and matching participants based on shared interests, personalities, and stated preferences
- Planned mentorship networking and reveal events by managing RSVPs, venue reservations, itineraries, and coordination across an 18-member executive board

SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, Java, C++, Bash, HTML/CSS, Presentation Coding Language (PCL)
- **Frameworks:** FastAPI, React, REST API
- **Databases & Tools:** PostgreSQL, Alembic, JWT Authentication, Git, ServiceNow
