EDUCATION

San Diego State University

Bachelor of Science, Computer Science, Minor in Finance (GPA: 3.79)

May 2028

San Diego, CA

EXPERIENCE

SDSU TEND Lab | *Computational Research Assistant*

July 2026 - Present

- Developed and tested fMRI task programs using Presentation Coding Language (PCL), enabling the collection of high-quality neural data for studies on social media influence and adolescent development
- Investigated approaches for incorporating TikTok-related stimuli into experimental tasks, documenting recommendations to guide study design

San Diego State University | *IT Services Front Desk*

June 2026 - Present

- Provided initial support for Canvas, Wi-Fi, printer, and general student technology issues through in-person and virtual channels
- Created and routed tickets to specialized support teams when issues required escalation
- Collected accurate issue details and communicated troubleshooting steps clearly to support an efficient student service experience

World Computing Organization | *Frontend Developer*

October 2025 - May 2026

- Built a React and TypeScript interview interface using reusable components and context-based state management, delivering an accessible, responsive AI interview experience that received positive user feedback
- Integrated REST APIs with backend services to enable reliable data exchange and responsive AI interactions
- Participated in code reviews and collaborated with backend engineers to improve component maintainability and documentation

PROJECTS

Personal Finance Dashboard

June 2026 - Present

- Developed a Python and FastAPI dashboard integrating Plaid API to collect transactions, categorize spending, and surface anomaly alerts
- Designed PostgreSQL data models and JWT-authenticated REST endpoints to securely ingest and deliver financial data
- Containerized local deployment with Docker to streamline development and testing

Preventative Care Planner

February 2026 - May 2026

- Led a 4-person Agile team to deliver a cross-platform React Native application for personalized preventative-care planning
- Developed a TypeScript rule-based recommendation engine that generated personalized healthcare measures from structured user input
- Implemented Supabase authentication and a dynamic recommendation timeline to organize individualized care guidance

CrewTrace – Reboot The Earth Hackathon

May 2026

- Collaborated on a 5-person team to deliver a React wildfire-response platform using live weather and camera-feed data
- Integrated the Gemini API to classify environmental risks and generate operational summaries for response planning
- Connected live data streams to the dashboard to support timely visualization of changing wildfire conditions

Leadership

Devs For Impact | *Founding Vice President*

July 2026 - Present

- Co-founded Devs for Impact, a student-led organization that connects San Diego nonprofits with student developers to build software addressing community needs
- Lead a software project for Nonprofits of San Diego, coordinating student developers, translating stakeholder needs into technical requirements, and guiding the project from planning through delivery
- Established a partnership with the World Computing Organization to organize a campus-wide social-impact hackathon, engaging students to develop technical solutions for nonprofit and community challenges

Asian Pacific Student Alliance | *Academic Coordinator*

May 2025 - May 2026

- Coordinated a mentorship program for 100+ participants and managed logistics for 10+ events using Supabase for participant tracking and Bash scripts for scheduling, which ensured consistent program delivery and increased participant engagement
- Collaborated with the executive board to design academic and community initiatives, tracking progress in a SQL database and organizing tasks with Trello, which improved communication among members and streamlined program execution

SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, Java, C++, Bash, HTML, CSS
- **Frameworks:** React, React Native, FastAPI, Node.js, REST API design
- **Databases & Tools:** PostgreSQL, Firebase, Supabase, Docker, Git, Linux (Ubuntu), unit testing
